

Detailed Report: Steven Carter

Date of Visit: October 18, 2023

Steven came in reporting fatigue, unintended weight loss of 10 pounds over the past two months, and occasional night s

Background:

- Occupation: Teacher.
- Diet: Balanced, no recent dietary changes.

Family History: Father passed away from colorectal cancer at age 65.

Findings:

- Physical exam: Palpable mass in the left lower quadrant.
- Lab work: Mild anemia, elevated CEA levels.

Imaging: CT scan revealed a suspicious mass in the sigmoid colon.

Diagnosis: Suspected colorectal cancer.

Recommendations:

- Colonoscopy with biopsy scheduled within a week.
- Advised to discuss genetic testing options.

Follow-Up: Post-colonoscopy results.
